

## Get proactive alerts when your route plans are scheduled to travel through impactful weather conditions

View radar and weather alert areas directly on the map, and identify if a planned route may be impacted by weather conditions. Review detailed weather reports and make insightful decisions to reduce costly delays and keep drivers safe.

- **Quickly identify weather conditions on the map** with optional radar, cloud, and alert overlays
- **Receive an alert in the route plan** if a route is scheduled to pass through a predicted weather alert zone
- **View a comprehensive report** that details the alert, effective and expiration times, certainty, severity, and urgency rating for the planned route
- **Make critical decisions** about routing drivers around hazardous areas
- **Notify drivers and customers** of potential delivery delays
