SPLC Data Updates

A Standard Point Location Code³ (SPLC) enables the PC*MILER database to generate routes for rating and freight bill auditing. A SPLC provides each point originating freight and each point receiving freight in North America with a unique code number associated with that point's geographic location. This update enhances the database with new codes or new acceptable names for an existing code.

³ For installed-based PC*MILER users, requires a Standard Point Location Code (SPLC) Add-on license.
